Narcissus (Daffodils)

WE OFFER the following varieties of hardy Narcissus, commonly called Daffodils or Jonquils. All lend themselves admirably to naturalizing, and if planted where they can be left undisturbed will multiply and increase in loveliness for years to come. Our bulbs are of the very best double nosed quality and are grown for us in Long Island.

	Doz.	100

Darwin Tulips

Darwin, Cottage and Breeder Tulips

WE OFFER the following varieties of Breeder, Cottage and Darwin Tulip bulbs (B) (C) (D), and recommend them for planting in beds as well as in groups in the herbaceous border and among shrubs. They usually begin to flower during the middle part of May, the blooms remaining in condition a very long time. To succeed with bulbs it is necessary to begin right, by getting sound bulbs of good size, and we warn intending purchasers against buying cheap, undersized bulbs and expect the fine results obtained from such as we offer. The flowers from our quality bulbs, the best that Holland produces and imported directly by us, are extremely large and borne on tall, strong stems.

The bulbs should be planted not less than five inches apart, and from five to six inches deep (to the bottom of the bulb) in well drained soil before the ground freezes. After the ground is frozen hard, a covering of leaves or straw will prevent the injury of the roots from frequent freezing and thawing. This should be removed in the spring as soon as heavy frost is past. Bulbs delivered postpaid.

	Doz.	100
